

Partner with Cox Business Services for a communications solution that's complete, efficient and secure.

Whether you're part of a federal, state or local government, you're in the business of efficiency. Today's government organizations can't operate with yesterday's technology if they expect to deliver better solutions at a better value to the citizens they serve. And today more than ever, customers require easier access to information and more convenient ways of doing business with you. That's why government organizations are turning to Cox Business Services as their communications partner. We have proven experience in providing government and other organizations with complete voice, data and cable solutions that are cost-effective and efficient. And we're a solid, stable partner for your organization, because we're backed by the full resources and high service standards of our parent company, Cox Communications, Inc. the third-largest cable provider in the U.S., serving almost seven million customers.

Nationwide, yet nearby: the perfect communications partner.

As a full-service, facilities-based provider of voice, data and video solutions, we're backed by one of the nation's largest broadband networks. Our system is made up of thousands of miles of fiber-optic cable, designed with self-healing, fault-tolerant SONET architecture for enhanced dependability. And it's monitored 24/7 through our state-of-the-art Network Operations Centers. At the same time, we make decisions and manage operations right here in your area so we can work closely with you, understand your needs, and provide prompt, professional and knowledgeable help whenever and however you need it.

Integrated communications solutions that meet the demands of government.

Voice solutions: Providing all the services and options you expect at the best possible value.

At Cox, we deliver all the business-grade telephone services and options you expect, from local and long distance to dedicated toll-free service and more. Whether you manage your own PBX system, or want a flexible Centrex solution or

another configuration with your own unique requirements, we can tailor a package that fills your needs right here in this locale, backed by our extensive nationwide network and our dedicated local service team.

Data solutions: Delivering the speed and efficiency you need to maximize productivity.

Cox data service provides strong and consistent connections to manage all your Internet and high-capacity data needs. High speed means high productivity, and Cox delivers it with fast Cox Business InternetSM and even faster Cox Optical InternetSM. Our self-owned and self-managed fiber-optic IP backbone provides a solid foundation for your increasingly complex data needs. With tiered bandwidth options plus services ranging from Cox Transparent LAN and OC-level bandwidth to teleworking solutions for remote employees and more, we can supply just the right high-capacity solutions and options you need.

Cable solutions: Completing your

communications and keeping you informed.

With Cox commercial cable you can get more than 100 channels of digital commercial cable television, plus a complete Music Choice option, giving staff and visitors alike an ideal way to stay on top of all the latest news, entertainment, events and more.

One provider for more efficiency, value and convenience.

Choosing any of the services we provide can help you operate more efficiently. Choosing a bundled package of voice, data and cable solutions from Cox gives you even greater cost-effectiveness and convenience. With one point of contact and one dedicated service team handling all your communications, you'll experience the kind of support that sets Cox Business Services apart from the average communications provider.

An impressive and growing resumé in government work.

Our success stories in partnering with governments and similarly large customers in the commercial world include the following:

- With our proven track record of consistently delivering reliable communications solutions, Cox Business Services has been placed on several of the highly coveted General Services Administration's Local Service Agreements. These agreements allow federal agencies in California, Nebraska, Kansas and Oklahoma to purchase telecommunications services directly from Cox as an approved government-sector provider.
- For two major U.S. Air Force bases, we delivered local commercial telephone services, including traffic studies, number portability, direct inward dialing, commercial subscriber lines, digital trunks, ISDN PRI, transport channels and systems, operator and directory assistance.

- For the U.S. Army and Navy, we provided commercial telephone services and data transport, plus managed and unmanaged WAN services.
- For a U.S. military base, we created a fiber-optic digital communications system that included an additional telephone number prefix, faster switching connections, increased off-base calling capacity, caller ID and desktop videoconferencing.
- We provided more efficient and less costly phone and Internet service for a city government in Rhode Island.
- For a state tax department in the Atlantic Region, Cox delivered a broadband teleworking solution allowing auditors to work from their homes, significantly increasing the department's overall operating efficiency.

These are just a small sampling of the high-capacity solutions we continue to provide government and business every day.

For communications that can help make the business of your government operation run more efficiently and cost-effectively, contact your local Cox Business Services office. Or e-mail us at CoxGovernmentSolutions@cox.com today.
