

*Cox Virtual Private Network service is a fully managed, turnkey solution that gives employees in any location fast, secure access to your network and connects remote offices to a central network. Offered in tandem with Cox Business Internet service, it's always on, with no need to dial in the company network for a connection. And with a variety of high-speed broadband connections available, it's a flexible and affordable way to boost productivity in today's rapidly changing business environment. So whether you're connecting remote employees to a private LAN, replacing teleworkers' dial-up connections or connecting satellite offices to a larger network, Cox Virtual Private Network can deliver more flexibility, more convenience, and more solutions to fit your needs.*

### How your business benefits from Cox Virtual Private Network

When you connect with Cox Virtual Private Network service, your business will benefit in a number of ways:

- **Increased productivity.** When your employees can connect to your business from anywhere, your business functions more efficiently. Now people can effectively work from wherever they're located — at the office, from home or on the road.
- **More flexibility.** Because no two businesses are alike, Cox VPN Site-to-Site services supports multiple topologies like hub-and-spoke and meshed network configurations. Using a combination of our VPN Remote Client and Site-to-Site Services enables corporate sites, remote offices, teleworkers and traveling employees to connect with ease.
- **Easy Integration.** With our simple integration process, your business can quickly and easily add new locations to your existing network.
- **A confident, secure connection.** With Cox VPN your data is protected with the same level of encryption and authentication that the largest e-commerce sites on the Internet rely on. So no matter where in the world you're located, you can communicate confidently and securely.
- **Constant accessibility.** Thanks to our hybrid fiber coaxial (HFC) network, you can give your employees a high-speed, always-on broadband connection from their home or remote office location, with no long waits for a dial-up connection.
- **Improved work environment.** Broadband connectivity has changed how and where we work. By connecting employees remotely through Cox VPN technology, you'll help to deliver improved working and lifestyle conditions, contributing to increased job satisfaction, commitment to their work and overall productivity.

**Accessibility, security, dependability.  
More reasons to choose Cox Virtual Private Network.**

<b>Speeds</b>	Up to 15.0Mbps/2.0Mbps Fiber- and HFC-based solutions available to meet your price and coverage needs.*
